

SHAKIB ANWAR NIBIR

Full-Stack Developer

Phone: +8801770054720 | Email: nibirshakib@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | Address: Pallabi, Dhaka

Work Experience:

Frontend Developer – intern at LawnHive (Company Profile: <https://lawnhive.com>) – April 2024 – August 2024

Project Live Link: [Tools 121 : Home](#)

Technology: Next.js | React | Redux | JavaScript | Tailwind CSS | Shadcn UI | HTML | CSS

- Developed reusable, efficient, and performance-optimized components using the latest Next.js framework with React for the project. Next js middleware and server components for efficient performance.
- Collaborate with the design team to stay current with project requirements and attend client meetings to analyze and report on project updates.
- Resolve UI-related issues to ensure a seamless user experience across devices, maintaining the responsiveness of the web application.
- Integrate APIs with the front end to display all necessary data to the user.
- State management and API integration using Redux and tool kit.

Software Developer – intern at Perceptron (Company Profile: <https://www.perceptron.site>) – July 2024 – August 2024

Technology: React | React Storybook | JavaScript | Tailwind CSS | Shadcn UI | Radix UI | HTML | CSS

- Developed reusable, efficient, performance-optimized, accessible, and easy maintenance components for React applications using Shadcn and Radix UI library and maintaining the application aesthetics.
 - Following Modular Monolith architectural pattern as the application structure and 4-point grid system spacing for the application.
 - Attend code reviews and maintain organizational coding structures.
-

Technical Skills:

Comfortable: JavaScript | HTML | CSS | Tailwind | React | React Router | Next.js | Daisy UI | Shadcn UI

Familiar: MongoDB | React Hook Form | Axios | React Query | Node | Express | Shadcn UI | JWT | Rest API

Tools: Firebase | Clerk | Postman | Vercel | GitHub

Projects:

Stay Finder – a homestay experience website Code Link || [CLIENT](#) | [SERVER](#) | [LIVE LINK](#)

- Stay Finder connects hosts with guests looking to lodge with a home feel.
- Multiple role-based authentication and authorization based on Guests, Hosts, and admins with data fetching done by transtack query.
- Stripe to handle payments inside the application with dynamic statistics for each type of user.

Technology: React, Tailwind, Node, Express, MongoDB, Axios, Transtack Query, Firebase, JWT, Stripe, AOS, Headless Ui

Plura – a real-time collaborative platform for idea-storming. Code Link || [GITREPO](#) | [LIVE LINK](#)

- User authentication system based on clerk authentication with organization creation ability and ability to manage organization. Ability to invite people to the organization for active collaboration.
- Next.js as the main frontend framework with Typescript. For styling Tailwind has been used.
- Convex as the main database, a real-time database with no additional backend server for fast data fetching and real-time synchronizing to ensure a real-time collaborative feel of the application. Liveblocks to create the interactive whiteboard.

Technology: Next.js, Tailwind, Convex, Typescript, Zustand, Shadcn UI, Clerk Authentication, Liveblocks.

Education and Certification

- B.Sc. in Petroleum and Mining Engineering from the Military Institute of Science and Technology (2019- 2023)
- Complete Web Development – Programming Hero (2023)

Additional Information

Language: **Bangla:** Native Speaker || **English:** Comfortable in written and verbal communication.
