

SHAKIB ANWAR NIBIR

Frontend Developer

Phone: +8801770054720 | **Email:** nibirshakib@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | **Address:** Pallabi, Dhaka

Objective:

A web developer committed to leveraging emerging technologies for innovative solutions. Guided by an unwavering commitment to continuous learning in web development, I seek a position to contribute creativity and a steadfast commitment to growth in collaborative and independent work settings within a dynamic team environment.

Technical Skills:

Comfortable: JavaScript | HTML | CSS | Tailwind | React | React Router | Next.js | Daisy UI

Familiar: MongoDB | React Hook Form | Axios | React Query | Node | Express | Shadcn UI | JWT | Rest API

Tools: Firebase | Clerk | Postman | Vercel | GitHub

Projects:

Panda Estate -- a real estate listing website.

Code Link || [CLIENT](#) | [SERVER](#) | [LIVE LINK](#)

- A built-in user authentication system with registration, sign-in, logout with Jwt, and cookies.
- Dynamic and up to 6 photo uploads via Firebase Storage for listing property.
- Frontend created with React and styled by Tailwind with user dashboard for seamless management Dynamic state management in React using Redux.

Technology: React, Tailwind, Node, Express, MongoDB, Axios, Redux, Firebase, Jwt, Mongoose

Plura -- a real-time collaborative platform for idea-storming.

Code Link || [GITREPO](#) | [LIVE LINK](#)

- User authentication system based on clerk authentication with organization creation ability and ability to manage organization. Ability to invite people to the organization for active collaboration.
- Next.js as the main frontend framework with Typescript. For styling Tailwind has been used.
- Convex as the main database, a real-time database with no additional backend server for fast data fetching and real-time synchronizing to ensure a real-time collaborative feel of the application. Liveblocks to create the interactive whiteboard.

Technology: Next.js, Tailwind, Convex, Typescript, Zustand, Shadcn UI, Clerk Authentication, Liveblocks.

InvetiSync Shop Management System -- a resource planning website

Code Link || [CLIENT](#) | [SERVER](#) | [LIVE LINK](#)

- Streamlined user registration using Firebase authentication.
- Dynamically assign user roles upon shop creation via MongoDB with JWT.
- Implemented subscription plans with Stripe Pay to enhance product limits. Dynamic state management in using React Query.

Technology: React, Tailwind, Node, Express, MongoDB, Firebase, React Query, Stripe, Daisy Ui, Axios

Education and Certification

- B.Sc. in Petroleum and Mining Engineering from the Military Institute of Science and Technology (2019- 2023)
- Complete Web Development – Programming Hero (2023)

Additional Information

Language: Bangla: Native Speaker || **English:** Comfortable in written and verbal communication.
